

Career and Technical Education Mission Statement

The mission of the Central District #301 Career and Technical Education curriculum is to prepare students for immediate employment and further career preparation at the post-secondary level. Through high quality programs, students learn via practical, logical, and sequentially structured experiences which will have applicability in today's job market as well as the market of the future. The Career and Technical Education curriculum will expand and enrich the opportunities for students to develop the following skill sets which will enhance their personal and workplace success:

- Technical expertise
- Conflict resolution and problem solving skills
- Leadership skills and workplace confidence
- Personal development and life transitions skills
